PROJECTS

Title: Spammer Detection and Fake User Identification on Social Networks
Social networking sites engage millions of users around the world. The prominent social networking sites have turned into a target platform for the spammers to disperse a huge amount of irrelevant and deleterious information.

Title: An Efficiency Ranked Keyword search method that protects your privacy
A verifiable mechanism is proposed for the guarantee of correctness and completeness of search results. In addition, the search efficiency and security under two popular threat models has been analyzed.

Title: Responsive Personal Portfolio Website
A responsive personal portfolio website is a digital platform where individuals showcase their skills, experiences, and projects to potential employers, clients, or collaborator.
